CHOOSING A GLOW-WORM CONTROL

Glow-worm's range of controls are specifically designed to work with Glow-worm appliances, helping to create highly efficient heating systems and further home comforts.

EASE OF USE

With a range of simple, smart and connected controls available, Glow-worm controls are simple to use and designed with you in mind so that managing your heating is straightforward.

CONVENIENT CONTROL

Smart heating systems can be controlled almost anywhere when your Glow-worm boiler* is installed with a Glow-worm control and internet gateway, allowing you to control your heating from an app.

ENERGY EFFICIENCY

Using a Glow-worm control with a Glow-worm boiler can improve the energy efficiency of your heating system, with the potential to save you money on your energy bills.

SMART HOME INTEGRATION

When installed with the MiGo Link internet gateway, you can manage your heating with voice commands when used with either Amazon Alexa or Apple HomeKit.**

*Compatible with all Glow-worm boilers manufactured from 2006.

** For single zone systems only.

MiGo Link Internet Gateway

Upgrade and connect your heating system with Glow-worm's new internet gateway.

The MiGo Link internet gateway allows you to connect your MiSet, MiGo Select or Climastat Select. Once connected you may control your heating and hot water via your smartphone on the MiGo Link app, or by smart speaker*, such as Amazon Alexa or Apple HomeKit.

- ✓ The MiGo Link internet gateway enables weather compensation when installed with a MiGo Select or Climastat Select, meaning your control will monitor the outdoor temperature and adjust your heating to run as efficient as possible. Saving you energy while still feeling the warmth
- ✓ Connect easily to Amazon Alexa or Apple HomeKit for additional smart home connectivity. Allowing you to control your heating and hot water requirements with voice commands*
- ✓ Compatible with all current Glow-worm boilers
- ✓ Installing the MiGo Link internet gateway allows you to control your heating on the go using the MiGo Link app

* For single zone systems only.

MiGo Link App

The MiGo Link app gives you complete control over your heating. From your app, you can remotely set time programmes, boost your hot water and more...

The MiGo Link app can be downloaded from either the App store or the Google Play store.

- ✓ Access all main functions of your heating and hot water requirements from one central place
- ✓ Allows you to see your heating's status at a glance
- ✓ View heating patterns and hot water consumption to monitor energy usage
- ✓ The MiGo Link internet gateway must be fitted with a MiSet, MiGo Select or Climastat Select control to allow total control of heating and hot water through the MiGo Link app
- ✓ Compatible with Apple HomeKit and Amazon Alexa*

* For single zone systems only

MiSet

Say hello to Glow-worm's MiSet control. With a semi-touch interface and easy-to-use features, you can manage your heating with a simple swipe of a finger. When paired with a reliable Glow-worm boiler, you'll get peak performance that will keep your home cosy for years to come.

- ✓ Semi-touch interface allows fuss-free heating at your fingertips
- ✓ Time programming assistant helps you set your timer in a few simple steps
- ✓ Modulates your Glow-worm boiler to ensure peak performance and optimum efficiency
- ✓ Wired and wireless option available
- ✓ When installed with the MiGo Link internet gateway, allows the use of the MiGo Link app to control your heating remotely
- ✓ Smart home integration with Amazon Alexa and Apple HomeKit*
- ✓ Weather compensated control when installed with an outdoor sensor**

* For single zone systems only

** Two zones when wired

MiGo Select

The MiGo Select is a small but effective wireless room thermostat. It pairs with the MiGo Link internet gateway which acts as both receiver and internet gateway. This is the perfect set up for single zone properties looking for a simple to use thermostat and control from an app or smart speaker.

- ✓ The MiGo Select is a wireless thermostat that can be mounted or left on a surface in any room
- ✓ Smart, but simple, the thermostat is easy to use and will track your humidity
- ✓ Install with MiGo Link internet gateway which acts as both receiver and internet gateway to control the system with the MiGo Link app
- ✓ With the use of internet data, the MiGo Select is weather compensating which will monitor and adjust your heating to run as efficiently as possible
- ✓ Compatible with simple systems with one heating zone
- ✓ Works with Apple HomeKit and Amazon Alexa*

* For single zone systems only

Climastat Select

The Climastat Select is the easy-to-use, simple and straightforward wired thermostat. Climastat Select will allow you to control your room temperature and is compatible with all Glow-worm boilers.

- ✓ Easy to use
- ✓ Clear digital display
- ✓ Simple and discreet two wire connection
- ✓ Ability to select a wide range of temperatures for your comfort
- ✓ Compatible with MiGo Link internet gateway which adds additional app control, weather compensation and smart home integration
- ✓ Suitable for use without any internet connection and can be used with an inbuilt timer on your Glow-worm boiler

Climapro₂

This incredibly easy-to-use, handheld remote control allows you to have complete control of your central heating and hot water.

- ✓ Simple-to-use handheld unit that can be wall mounted or portable within the living area
- ✓ Backlit display provides advanced user control and functionality
- ✓ Two channel wireless programmable room thermostat to control both central heating and hot water requirements independently

Wired and wireless outdoor sensor

The outdoor sensor enables weather compensation when paired with a MiSet or Climapro₂ for single zone systems. This means by monitoring both the internal and external temperatures your heating will only run when it's needed, ensuring that your home remains at a constant temperature all year round, without you having to lift a finger.

- ✓ Wireless weather compensation sensor using inbuilt solar PV cells
- ✓ Enables weather compensation when paired with Climapro₂ RF
- ✓ Powered by indirect sunlight which re-charges the small PV cells (wireless only)
- ✓ Simple and quick to install
- ✓ Use with MiSet for single zone systems
